

FISCAL NOTE

HB 2029 - SB 1999

January 31, 2002

SUMMARY OF BILL: Reinstates the requirement that applicants must have a social security number to be eligible for a driver license or photo identification card.

ESTIMATED FISCAL IMPACT:

Decrease State Expenditures - Not Significant
Decrease State Revenues - Not Significant

Other Fiscal Impact - Because of the high volume of applicants without social security numbers who received driver licenses or identification cards in May and June of 2001, it is estimated that there will be a significant impact on renewal fee revenues in 5 years when those seeking renewal without a social security number will not be eligible under the provisions of this bill.

Estimate assumes:

- a decrease in administrative expenditures related to the decrease in the number of individuals eligible to receive a driver license or photo identification card.
- a decrease in revenues from the decrease in fees collected for driver license or photo identification card issuance.
- the Department of Safety indicates that the initial increase in driver license and identification card issuance activity has leveled out to numbers comparable with those prior to the original change in eligibility requirements so the decreases in expenditures and revenues are estimated to be not significant.

CERTIFICATION:

This is to duly certify that the information contained herein is true and correct to the best of my knowledge.

James A. Davenport, Executive Director
